If you’re serious about your dream, we’ll take your dream seriously.

We empower and support individuals who are pursuing their dreams in creative industries – because it’s those people who make our world amazing.
We’re Different

When we began, we set out to offer something different in the world of education – providing real-world environments for students to hone their crafts.

Today, Full Sail University has evolved to serve the many facets of entertainment, media, arts, and technology. We’re a community united by the drive to create and the courage to be different.
Life is full of systems, rules, and frameworks. But the people who make an impact aren’t concerned with categories, or whether or not they’re fitting in. Their passion to do something different is all they need to drive them – no matter how long it takes to succeed.

Whether it’s a song that moves people to tears or a life-changing piece of technology, great ideas don’t just come out of a box. They come from people who aren’t afraid of being original.

Full Sail is a place for those people.
Collaboration is a huge part of any creative industry, and it comes naturally here.

Being proudly passionate about something can make you feel like an anomaly. But when you come to Full Sail, you'll find yourself surrounded by people who get it.

So whether you're working on a project with classmates, contributing your talents to a production team, or bouncing ideas around with your instructor, you'll be building meaningful connections that will extend into your career.
Learn it.

Every degree at Full Sail is agile, adaptable, and created from industry input.

- Courses progress monthly, so when an important innovation comes along we can quickly integrate it into our curriculum.
- Our Program Advisory Committees are groups of active professionals who regularly work with us to keep our degrees relevant.
- Our educators stay engaged with their industries and bring decades of experience to the courses they teach.
- Career preparation is woven into your degree program from day one through career development modules.
- Integrated portfolio modules provide ongoing opportunities to create real projects so you can demonstrate your talents to future employers.
Fast.
Focused.

In nautical terms, "full sail" means you are positioned in the best possible way to move forward at optimum speed. And that’s how we view education. It’s directing your passion at your career goal in a focused, accelerated way.

Since we began, we’ve offered programs at a faster pace than traditional schools, so that students adapt to the 24/7 nature of their industries.

A bachelor’s degree can take as few as 20 months instead of four years. This allows you to graduate in a shorter period of time so you can start your career earlier.
Imagination

It’s amazing how technology gives us new pathways to learn and create.

We don’t just train you on how to use a certain device or software program – you’ll explore and discover creative tools to understand their full potential. Your industry’s technological tools are integrated into your learning spaces, projects, and curriculum.

"Full Sail’s dedication to innovative curricula is to be commended and is consistent with what today’s dynamic, technology-rich global economy demands from its professionals. Its progressive educational approach puts students and graduate success at the forefront of the institution’s mission.”

John Couch, Vice President of Education

Project LaunchBox is a Full Sail program that provides students with powerful technology to help create projects. You’ll receive a MacBook Pro® along with a software package customized to your degree program. All of your files, multimedia creations, and coursework are at your fingertips 24 hours a day, seven days a week.

*Pricing and package specifications are subject to change. For certain game and technology programs, students receive an HP® Mobile Workstation and relevant software tools.
While Full Sail’s campus is an experience unlike any other, our online degree programs are proof that you can earn a creative degree no matter where you are.

- We designed our own online learning platform to suit the way you learn and create.
- Courses use collaboration tools so you can share and critique projects with your classmates.
- Through live classes, you’ll be able to interact with your instructors and peers in the same way you would in a studio or classroom.

YOU R CAMPUS IS everywhere
Full Sail is a hub of activity

Guest speakers. Conferences. Career expos. On-campus productions. Recruitment events. Full Sail provides constant opportunities to gain experience and learn from active pros.

Credited on releases by artists such as Beyoncé, Jay-Z, and Britney Spears, Full Sail graduate and Hall of Fame Inductee Jordan "DJ Swivel" Young talks about his career in music at an on-campus event.
Bruce Swedien, known for his mixing and engineering on Michael Jackson's Thriller, shares highlights of his career at a campus event.

Special Guests
From game developers and movie makers to rockstar designers, our campus plays host to real-world visitors – giving you a firsthand look at real life in the entertainment and media industry.

Recruitment Events
Sometimes the industry comes directly to us for their talent needs. Media companies who have reached out to Full Sail for internships and employees include EA Tiburon, Lucasfilm, Nickelodeon Animation Studio, Blizzard Entertainment, and more.

Career Networking Events
Career Development regularly hosts industry events. From recruiting fairs to product demonstrations. Student are able to meet with employers and even participate in on-site interviews.

Hall of Fame Week
The annual Hall of Fame celebration recognizes Full Sail graduates and their influence on more than three decades of entertainment and media. The weeklong series of events includes everything from industry Q&A panels to a career expo, to student celebrations and live music.

Awards
Full Sail grads have been involved in projects that have gone on to receive major nods – including GRAMMY, Oscar, and Emmy awards. Full Sail invites students to watch these exciting moments and enjoy themselves at our on-campus award parties.

Full Sail's partnership with Rooster Teeth has resulted in on-campus events for students. Dan Patrick and Sage Steele talk to students about the future of sportscasting.

Pop punk band Real Friends take the stage at a Vans Warped Tour kick-off event at Orlando’s Camping World stadium.

Students check out opportunities at a Vans Warped Tour kick-off career event at Orlando’s Camping World stadium.

Joey Morelli, Editor of Media Production at Universal sits down with students for a meet and greet during Hall of Fame week.

Students line up for photos at the Oscar viewing party.
Student Opportunities

Full Sail’s relationships in the world of entertainment and media have led to unique hands-on, experience-building opportunities for students and graduates.

A group of Full Sail students were given a once-in-a-lifetime opportunity to work behind the scenes at WWE’s biggest event, WrestleMania. Student roles included camera operation and audio tech.

WWE NXT

The Full Sail campus regularly hosts tapings of NXT programming, which airs weekly on the WWE Network. Students gain real-world experience alongside professional mentors in producing the show. Proceeds from ticket sales contribute to student scholarships.

Full Sail Armada

Armada is Full Sail University’s collegiate esports organization. Students in Armada teams compete across a variety of games throughout the year, including Overwatch, League of Legends, Hearthstone, and more. They participate in tournaments, friendly get-togethers, and travel for competitive play.

REBL HQ

REBL HQ is Full Sail University’s on-site video production studio. Students have had the opportunity to utilize professional spaces and resources for a variety of short-form productions, including web series, pitches, interviews, and more.

Full Sail’s partnerships with Wargaming.net have led to experiences for students to test products by major and independent game studios using advanced technologies such as eye-tracking and facial recognition software.

The Florida Film Festival offers workshops, product demos, and countless networking opportunities—and the event has regularly featured films by students, graduates, and faculty members.

At the National Association of Broadcasters event, Full Sail students interning with Sony assisted with product demos and presentations.

Since partnering with Full Sail University, WWE has awarded 25 scholarships to Full Sail students, for a total of $350,000.

Professional esports team Florida Mayhem visits Full Sail for an exclusive event.
We're proud of our alumni and the ways they've influenced their industries. Here are just some of the artists, companies, and projects that have seen the contributions of Full Sail’s more than 60,000 graduates.
Hall of Fame

From Oscar and GRAMMY-winners, to animators, to creative directors and entrepreneurs, our Hall of Fame alumni have made significant contributions to their industries – as well as the Full Sail community. Every year, we celebrate their accomplishments through a weeklong event complete with educational panels, entertainment, and more.
Programs for Creative Minds

Music & Recording

Business
Sports
The power of music and audio is something that can't be expressed in words. It's no wonder that it has such an influence on the world and connects so many people.

Creating music professionally is something that millions of people dream about. And those who succeed are there because they've worked tirelessly and have made themselves indispensable.
Aspiring composers learn more than writing - they diversify their talents so they can understand different musical styles and study business essentials so they can market their work. Recording engineers get their hands on equipment and explore both the art and science behind a good track. Show producers explore the elements that come together for a riveting live experience, and they build those skills in real venues, with real performers.
Worlds. Universes. Characters. Code. They come together to make addictive experiences that can rival movies in their fandom and influence.

GAMES

Full Sail was one of the first schools to enter the gaming arena. Our programs are engineered to emulate the development studio experience - from the software and tools, to the projects, collaboration, and workflow.

- Game Design
- Game Development

Graduate
- Game Design
- Mobile Gaming

Top Undergraduate & Top Graduate schools to study Game Design for 2018 - Princeton Review, 2018
We know game degrees aren’t one-size-fits-all, so our programs take different paths depending on where you want to go – whether you’re aspiring to bring environments to life or ready to dig into programming.

In the on-campus UX lab, students can test indie and major studio game releases. The space was launched through a collaboration with Wargaming.net.
Art takes a wild array of forms, but it’s all united by the act of expression. And when it melds with design, it brings the world ideas and objects that enhance our day-to-day lives.

Good design is something that can’t be manufactured – it can only come from the minds of creative people. The goal of Full Sail’s art and design programs is to encourage artists to embrace their eye for the original and guide them to a career path that’s fulfilling.
Students in our degree programs build traditional skills like drawing and sculpting while getting familiar with digital tools and software. With programs that emphasize real-world experience and portfolio creation, they’ll be armed with the skills to support the creative needs of clients and studios.

Art Studios

Students need a solid foundation to help them develop the skills needed to create digital art. Full Sail’s campus is home to several art and design studios in which students can study figure drawing, 2D animation, sculpting, photography, and more.
Filmmakers have more creative control than ever. Today’s storytellers can now get their content out to wide audiences and capture cinema-quality video on palm-sized devices.

Viewers are craving content from seven seconds to 17 episodes and everything in between—and they have plenty of options. In order to get their attention, it’s essential to understand what goes into a great story and an effective production.
Film Backlot

The Full Sail Studios Backlot allows students to shoot on location without leaving campus. This group of facilities gives students the creative freedom to set their film projects in locales ranging from Amsterdam to the French Quarter.

When you study filmmaking at Full Sail, you’ll build your skill set in an independent studio environment – regardless if you’re learning online or on set. Your projects are real films that are produced, shared, critiqued, and pitched. This gives you content for a diverse portfolio to promote your skills, and the kind of experience that prepares you for the rapid pulse of the filmmaking world.
The impact of technology on our lives is so deeply ingrained that it’s almost invisible. And that’s all thanks to the creative minds that develop and implement it.

From the 24-hour news cycle to smart devices in our homes, the tech world’s influence and innovations continue to grow. Our programs are equipped to adapt to technology’s ongoing evolution as it happens - through our fast-paced, project-based educational approach.
The Fab Lab
From parts to prototypes, students can bring projects to life in Full Sail’s Fabrication Lab – equipped with technology such as 3D printers and scanners, laser cutters, an injection molder, and tools for electronics development.

You’ll be crafting actualized projects in teams and environments that function like the real world – whether you’re coding an application, problem-solving through simulation, or establishing a cloud network. And because our programs are fast-paced, you’ll stay challenged and graduate earlier – which makes a big difference in such a dynamic industry.
What do short stories, blog posts, scripts, advertising pitches, social media campaigns, and corporate presentations have in common? They all rely on the power of storytelling.

Career options in media and communication are more diverse and widespread than ever. Brands, businesses, and consumers seek captivating content, but it needs to pop in such a noisy world. Today’s writers and storytellers require specialized skills and the flexibility to shift from page to platform.
Whether you’re passionate about fiction, journalism, or the power of persuasion, the courses in your degree will show you the ins and outs of the channels that help the world connect. You’ll build and broaden your talents through workshops and ongoing portfolio projects, and get specific insight on how to develop yourself as a communications professional.
Throughout every industry, businesses need talented minds and original ideas.

Business is driven by creative thinking – the ability to harness a good idea and turn it into something not just feasible but successful.

Our project-based degree programs give you real-world experience as you develop your own business plans and concepts. You’ll connect with outside companies to learn firsthand from industry professionals and unique business scenarios.

One of the Top Music Business Schools with Buzz
- The Hollywood Reporter, 2013
Being a part of the Full Sail community means being surrounded by industries throughout entertainment, media, the arts, and technology. So you can become familiar with a variety of business models, develop your niche, or build out an entrepreneurial idea, all within a thriving network of creative professionals.
The sports industry thrives on savvy business moves, impactful brands, and real-time communication. Through Full Sail University’s sports-focused degrees, you’ll learn the topics and technologies that power the industry – because they’re developed by the industry itself.

Whether you’re interested in marketing, management, content creation, or live presenting, our programs provide you with a fast-paced, hands-on experience that will prep you for your next move in an industry that never stays still.

Graduate
Entertainment Business - Sports Management Elective Track
Along your academic journey, you’ll have access to a support team to assist with any challenges along the way, from academic advising to a dedicated student support center.

Whether you’re learning online or on campus, you’ll become part of a network of individuals who share your passion. It extends beyond graduation, through an active group of alumni, plus career development support that’s available throughout your professional life.

Full Sail University graduates are located all over the world. We hold networking events throughout the U.S. and beyond, and provide resources for alumni to stay in touch and share professional insights.

From career guidance by advisors that are dedicated to specific industries, to an outreach team that brings in companies for events and recruitment, our Career Development department stays tuned-in to relevant trends and hiring needs. They’re here for you at every stage of your career, whether you’re an intern or an industry veteran.
